

# Connecting a Chromebook Devices to Cuesta's Eduroam Wi-Fi Network

**Connect to Wi-Fi:** If your Cuesta-issued Chromebook does not automatically connect to the **Managed-devices Wi-Fi** when you open it on campus (SLO or NCC), click the Wi-Fi icon in the bottom right corner of the screen and select **eduroam** from the list.

1. The Join Wi-Fi network window will appear, please check the **EAP Method** is set to **PEAP**.
2. Next, please change the **EAP Phase 2 authentication** from Automatic to **MSCHAPv2**.
3. Then change the **Server CA certificate** from Default to **Do not check**.
4. Scroll down to the **Identity** section. Enter your **myCuesta email** (typically formatted as: **firstname\_lastname@my.cuesta.edu**), followed by your **myCuesta portal password** in the password field.
5. After entering your information, click **Connect**.

The screenshot shows the 'Join Wi-Fi network' interface. The SSID is set to 'eduroam'. The Security is set to 'EAP'. The EAP method is set to 'PEAP'. The EAP Phase 2 authentication is set to 'MSCHAPv2'. The Server CA certificate is set to 'Do not check'. There are empty fields for Subject match, Subject alternative name match, and Domain suffix match. The Identity section has a text field containing 'first name\_lastname@my.cuesta.edu' and a Password field with masked characters. There is an 'Anonymous Identity' field below the password. At the bottom, there are two toggle switches: 'Save identity and password' (checked) and 'Allow other users of this device to use this network' (unchecked). At the very bottom right, there are 'Cancel' and 'Connect' buttons.
